

# RECYCLED PRODUCTS

ENVIRONMENTALLY SOUND  
ECONOMICALLY SMART

*"The City of Thousand Oaks is quite pleased with its experience with RAC. We've been using RAC for over a decade and encourage the use of this product in other California cities. If we can see the benefits of RAC so can you."*

— Tom Pizza, P.E.  
Engineering Division Manager, City of Thousand Oaks  
Construction and Right of Way Management

Good for the Bottom Line. Good for the Community.  
Good for the Environment.

Using recycled-content materials including recycled aggregate, tire derived aggregate, rubberized asphalt concrete and organics can save money and help protect the environment.

Recycled-content materials often have multiple uses and are known for their performance or durability.

To learn more about how recycled-content materials can work for you, visit [www.ciwmb.ca.gov](http://www.ciwmb.ca.gov).

*Tire derived aggregate provides cost-effective vibration mitigation in light rail projects.*
